PROJECTS

Discord Bot

Discord bot created in python using Discord.py api. It is responsible for changing the nickname of any individual joining the server and sending them rules on personal chat. It also provides feature to take a poll on any subject and decide the winner based on maximum votes. Lastly it has a feature of getting the top,new,hot posts from reddit using the reddit api integrated in the bot using only a single command.

Youtube Video Downloader

Downloads any youtube video using multiple api's

SKILLS

Confident in Python, c++, Java

Comfortable in working with various apis such as discord, twitter, reddit and learning new ones

Worked with web frameworks such as Django and spring(more comfortable in django)

LANGUAGES

Python, c++, java, dart
